HERITAGE AND LEGACY

Inspired by our hometown crag, Smith Rock State Park, Entre Prises USA was established through a partnership with Entre Prises France in 1988 to make world-class climbing accessible to everyone. Since our first artificial climbing walls over 30 years ago, EP has built more than 7,200 climbing walls and boulders worldwide, using state-of-the-art technology and design.

The decision to work with EP means you'll be collaborating with the most reliable wall-building partner in the industry: an expert team of craftspeople and climbers—who also happen to be industry-leading consultants, designers, engineers, and project managers—who work hand-in-hand with you to supply custom-built products supported by high-quality service. As a leader in the climbing industry, we take joy in delivering complete climbing wall solutions to our customers by designing your vision and building it into a reality. EP prides itself on delivering innovative, advanced climbing facilities purposefully crafted to evolve with the sport of indoor climbing.

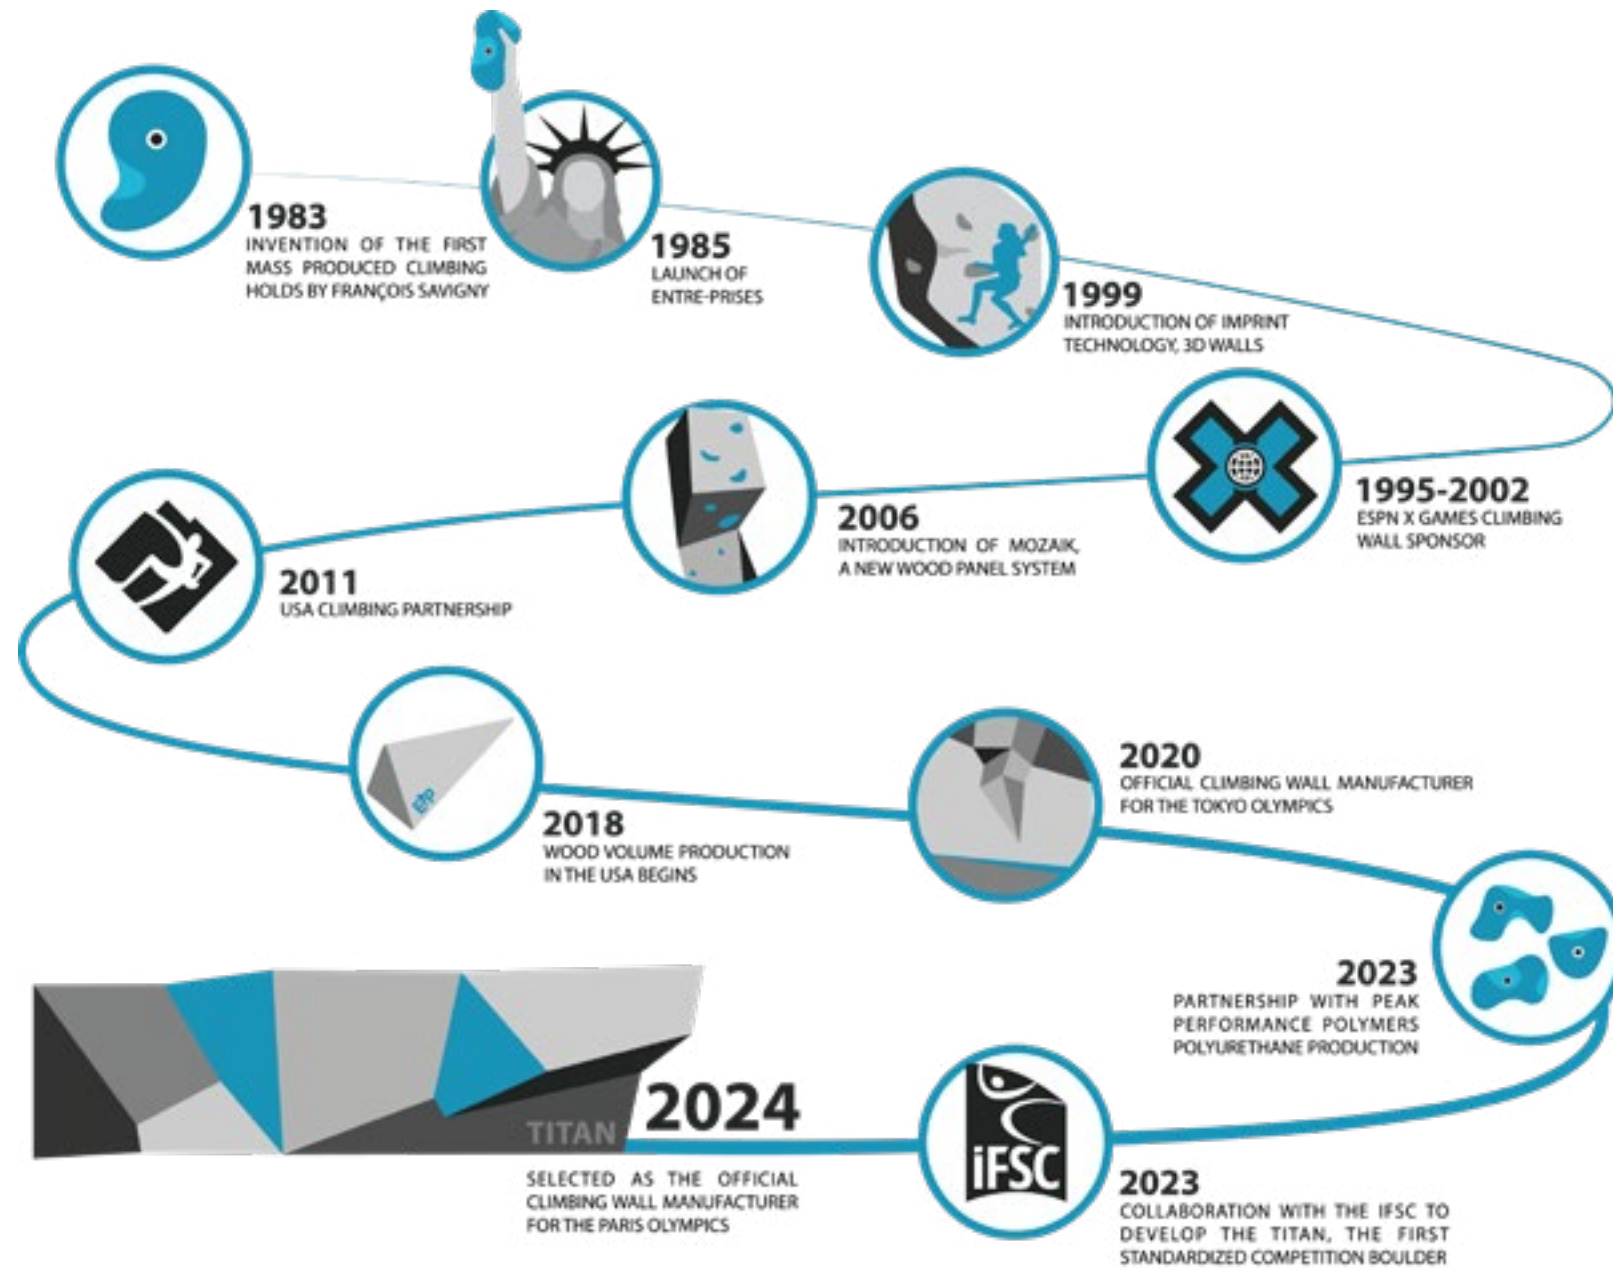

From sparking the first sport climbing revolution with our Freeform walls, to making history as the official supplier of climbing walls at the Olympics, EP brings climbing to everyone.

PARTNERSHIPS

EP is a proud partner and official hold, volume, and wall supplier to the International Federation of Sport Climbing and USA Climbing.

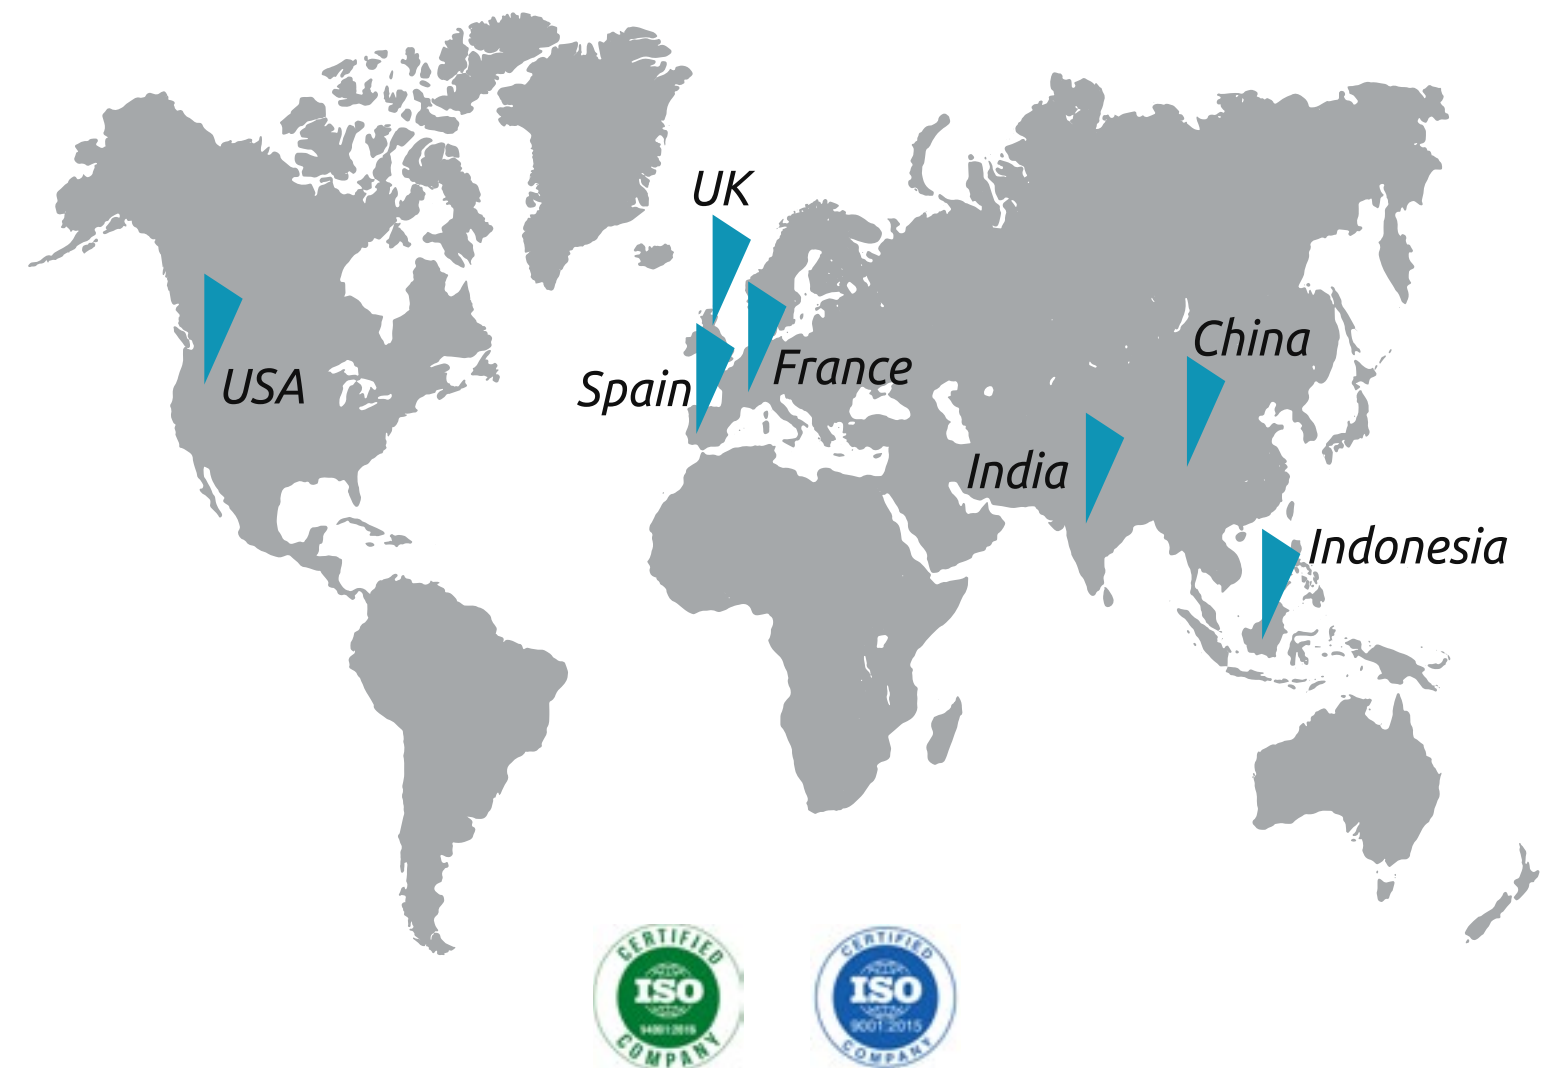

HISTORY

A GLOBAL LEADER

7 SALES OFFICES WORLDWIDE

5 PRODUCTION FACILITIES

THE EP APPROACH

After your initial contact with EP, Allison, Nathan or Courtney will partner to define the scope of work and bring your vision to life. Your sales manager will work closely with you through contracting.

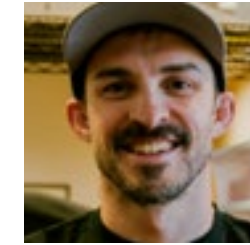

Bennett and Chi are EP's Surface Designers. They conceptualize the wall from an idea to final design.

Blake and Chip manage all projects as they flow through EP's process. Once a contract is signed, they'll be with you every step of the way.

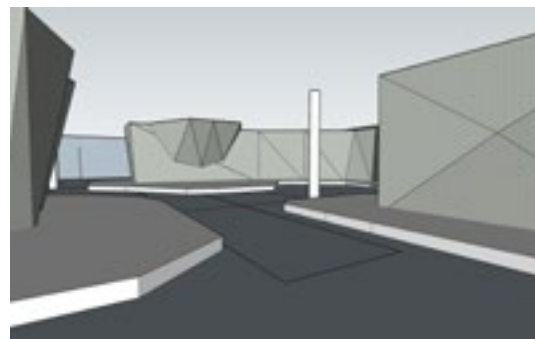

Once your project is complete, we're still here to support you through the life of the wall. Nick and Joey from our Service and Retail departments are ready with everything you might need.

MASSING

- Collaborate with Sales and Design in building a 3d model of your space
- Identify scope and scale of project to suit your budget and vision
- Focus on layout of space and distribution of angles

PROPOSAL

- A formal quote based on an agreed and previously reviewed massing
- Helpful to secure funding and build a complete project budget

CONTRACTING

- A project manager becomes your main point of contact while your sales manager begins to phase out.
- Identify mutually agreeable schedule and contract language

DESIGN

- Final surface is designed through routine, collaborative meetings
- Drafting lays out the structure for the wall
- Construction drawings are completed

INSTALLATION

- Installation crews arrive onsite and assemble your wall
- Engineering and manufacturing processes help ensure installation is fast and efficient

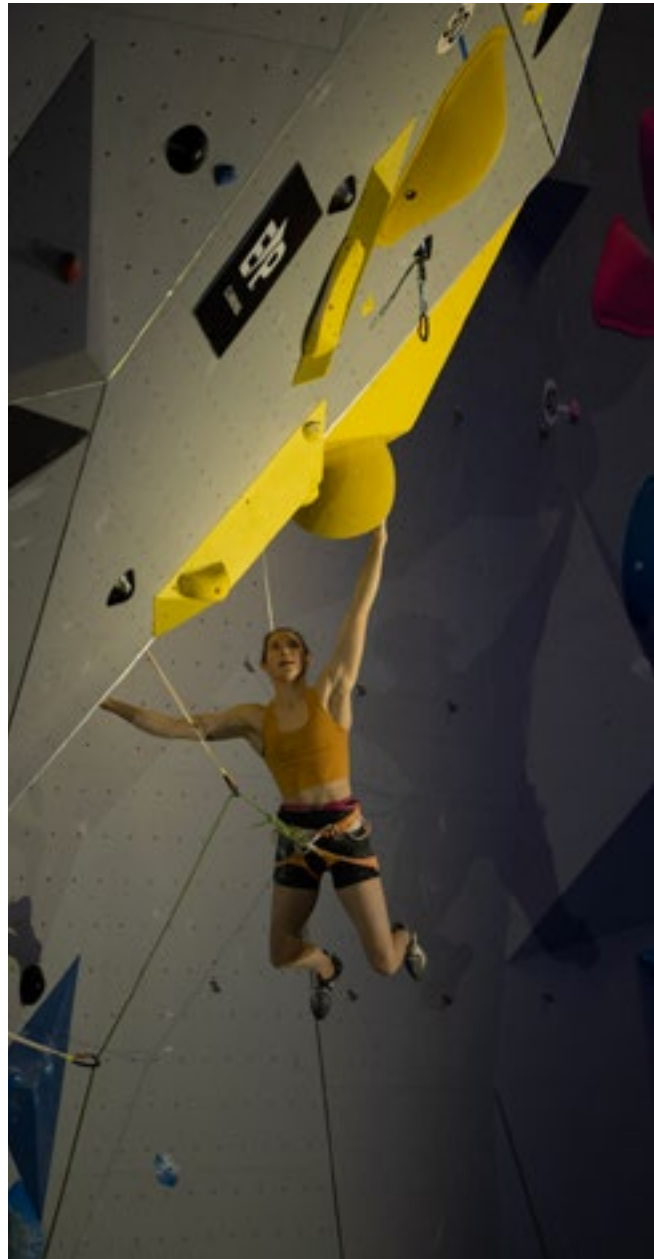

CONTINUED SUPPORT

- Prologue your investment with instruction, inspections, maintenance, and repairs
- Keep your wall fresh with the latest holds, volumes, and equipment

MESA RIM AUSTIN

Austin is the fifth and most ambitious project EP has completed for Mesa Rim. Boasting 34,500 square feet of Mozaik surface, it's one of the largest commercial climbing facilities in the United States. It was opened just in time to host USA Climbing's 2023 Team Trials.

PORTLAND ROCK GYM

Portland Rock Gym's Beaverton location is the crowning jewel for one of the longest climbing gym lineages in the US. With over 32,000 square feet of climbing and one of the most expansive facilities in the country, PRG boasts unique, one-of-a-kind features designed in house.

MESA RIM NORTH CITY

Mesa Rim North City is a 22,500 square foot, full service climbing facility that was opened in 2021. The ground up facility is an impeccable example of a collaborative design approach. Details—such as expansive sight-lines, diverse terrain, complementary aesthetics, and efficient use of space—demonstrate the shared experience between Mesa Rim and EP.

BEND ENDURANCE ACADEMY

Bend Endurance Academy is a non-profit with the mission of promoting healthy living through activity. Their 3,000 square foot, private training facility provides accessible and inclusive climbing development programs for ages 2 through 75.

ROCK SOLID

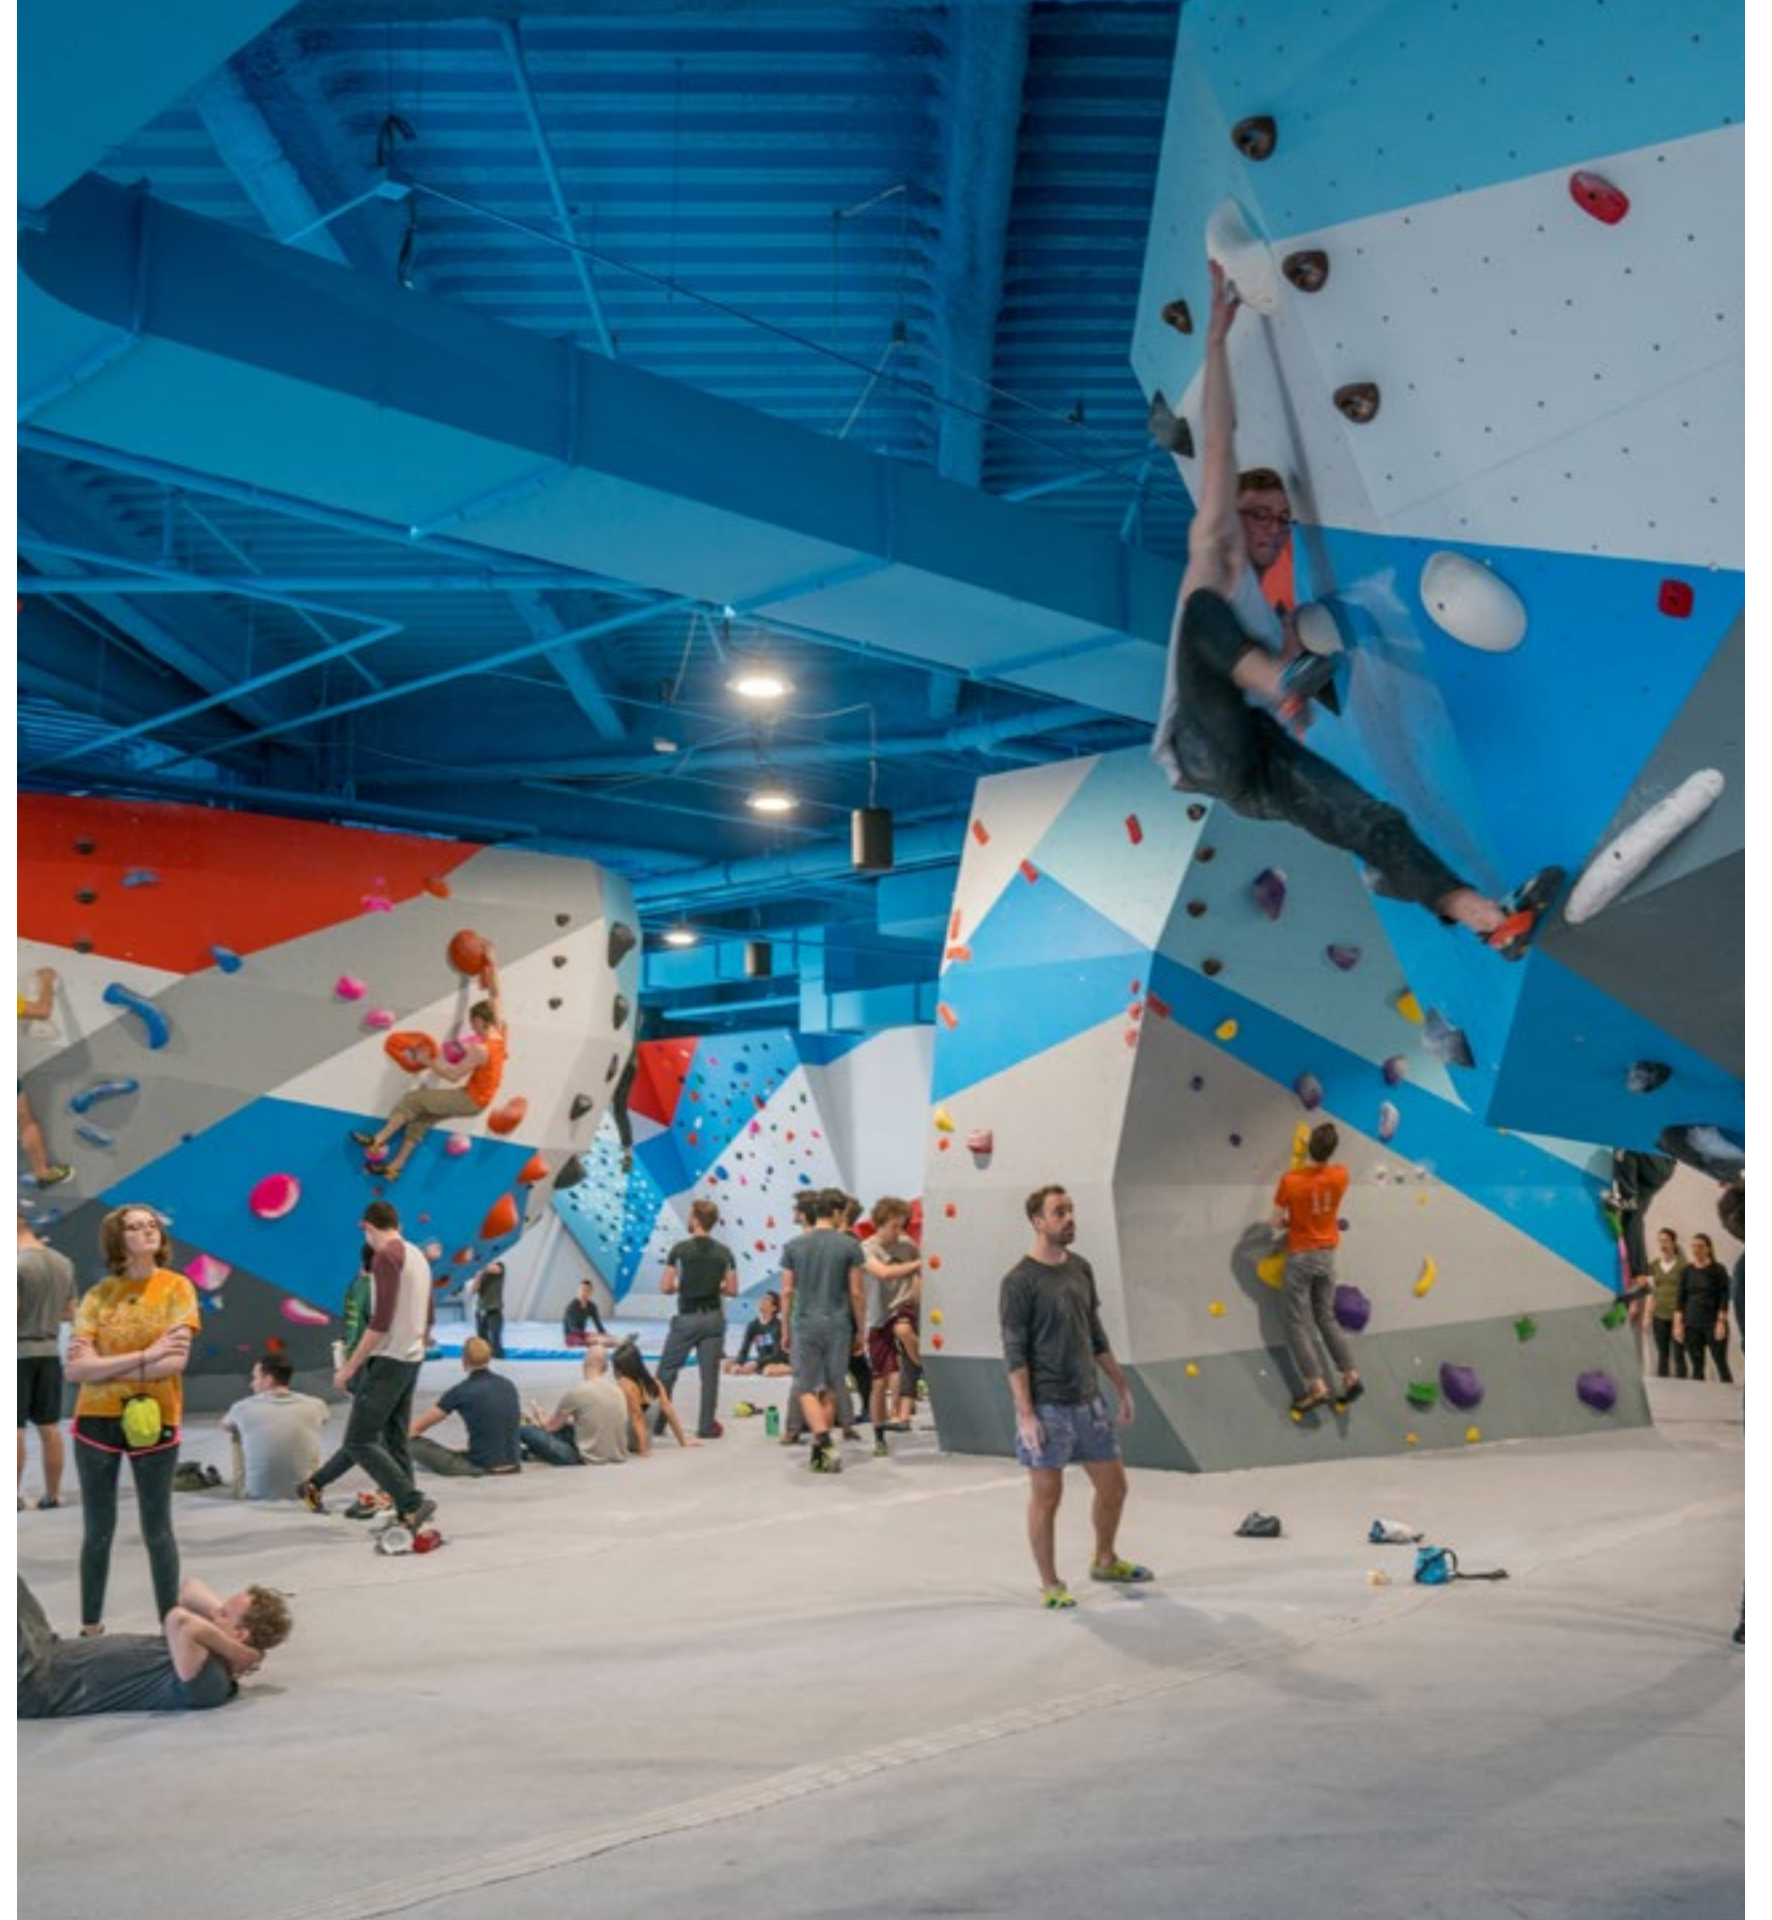

Balancing the needs of families and devoted climbers alike, Rock Solid hosts 11,000 square feet of bouldering surface with a handful of shorter rope anchors. An extra emphasis on aesthetics includes custom wall colors and a built-in wall logo to encapsulate the facility's brand.

FIRST ASCENT: BLOCK 37

Located on the third floor of a revitalized social hub in the heart of Chicago, First Ascent's 7,000 square foot bouldering facility provided numerous logistical and engineering challenges. EP's collaboration with contractors, engineers, and building management was put the test in this one-of-a-kind build.

COEUR CLIMBING

With 6,000 square feet of Mozaik surface, Coeur Climbing is a home-town facility located in the burgeoning recreation town of Coeur d'Alene, Idaho. Coeur Climbing demonstrates the continued expansion of climbing from urban centers to rural towns.

GRIPSTONE

Gripstone' perfectly reflects the competition climbing background of it's owners through it's 14,000 square foot facility. Meaningful amenities, curated wall angles, a 15-meter speed wall, and ample spectating space made Gripstone an excellent host facility for 2023 Collegiate Nationals.

VITAL BROOKLYN

When constructing their Brooklyn location, the team at Vital sought to add rooftop bouldering to their facility for increased capacity and spectacular views. Mozaik XP proved to be an optimal product choice to promote quality route setting and durability in the harsh environment.

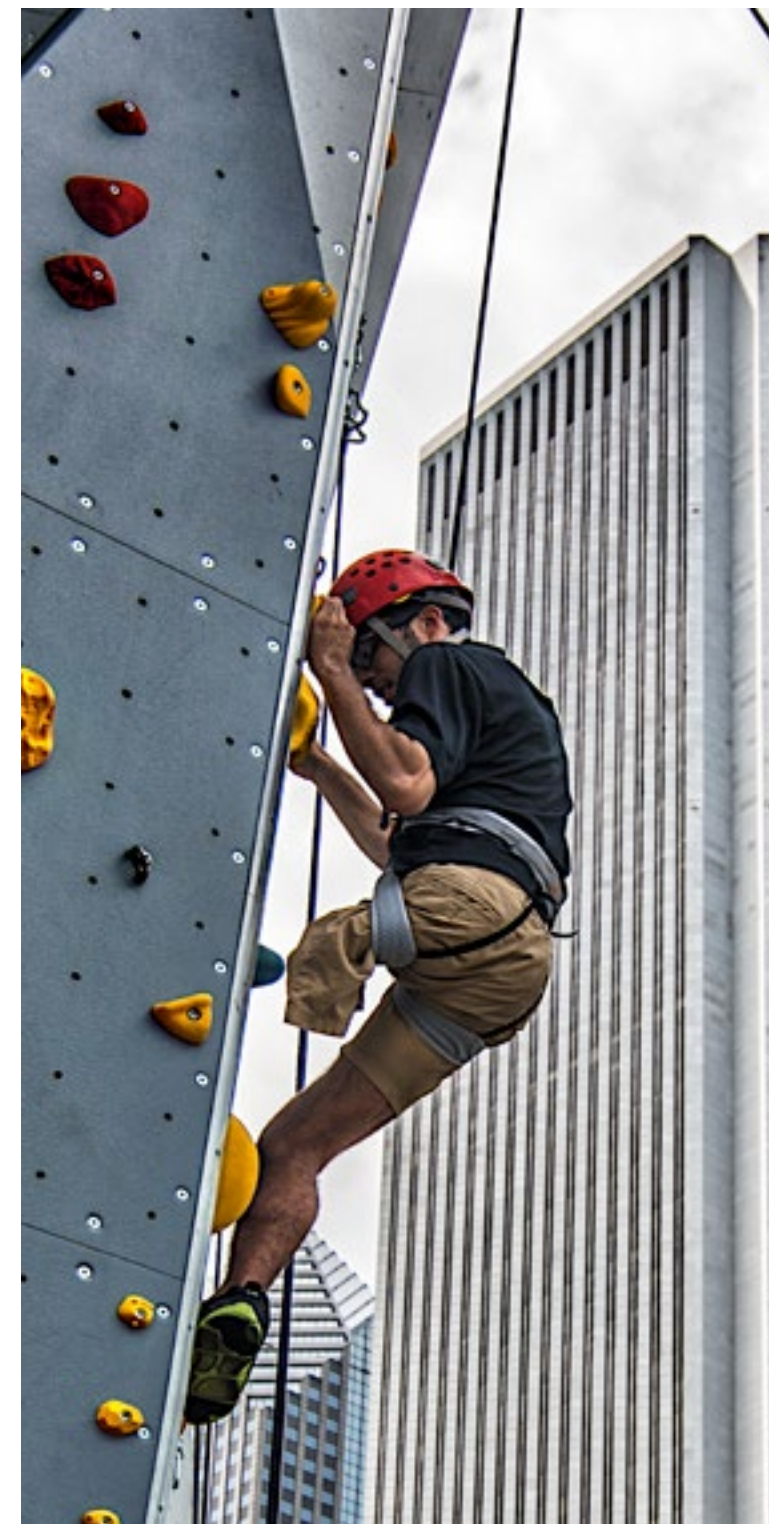

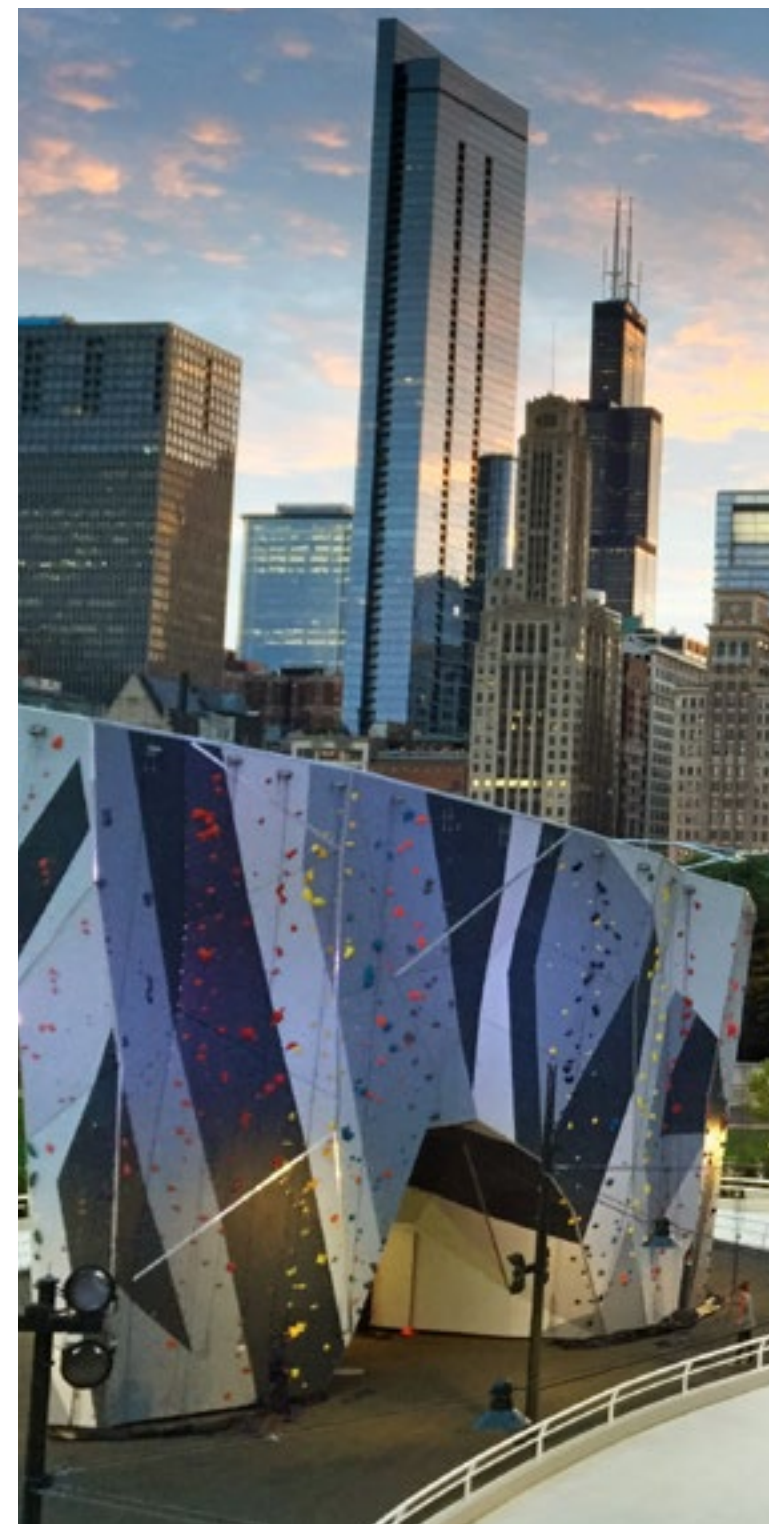

ALPENGLOW PARK

Thanks to public request, Alpenglow park features EP's full range of standardized Freeform boulders as well as two large, custom boulders. A mix of natural features and commercial style route setting allow for limitless possibilities in a one of a kind location.

MAGGIE DALEY PARK

Located on the shore of Lake Michigan in Chicago, Maggie Daley park features a full climbing gym outdoors and was an inspiration for our current Mozaik XP product. Punctuated by more than 17,000 square feet of climbing surface and lead climbing walls reaching higher than 45 feet, it rivals many modern, full-service commercial climbing gyms.

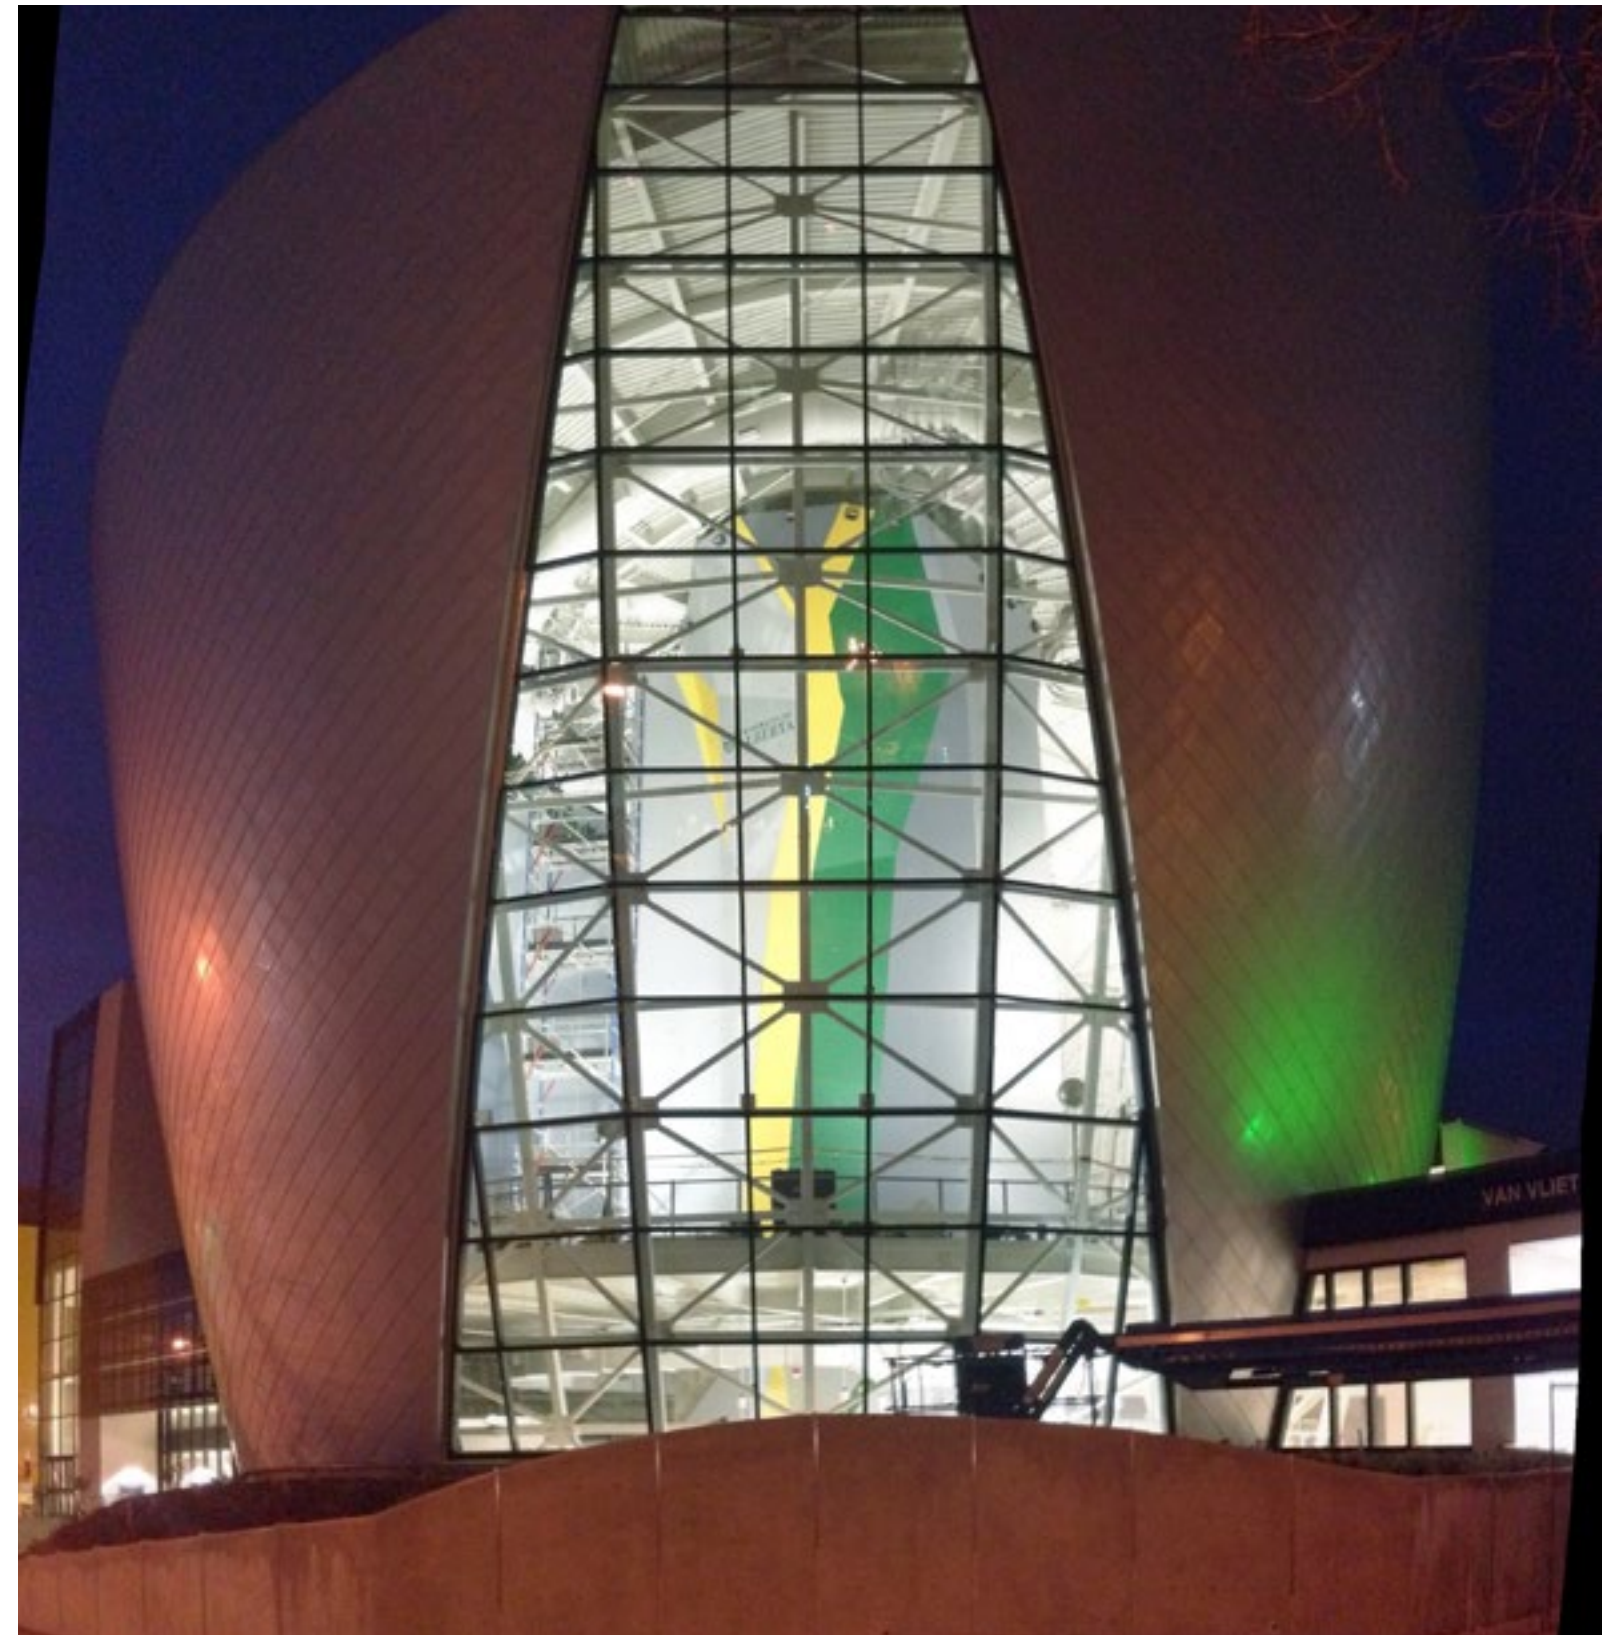

CALIFORNIA POLYTECHNIC STATE UNIVERSITY

Originally built in 2009, Cal Poly elected for an outdoor climbing structure to take advantage of the San Luis Obispo weather. After more than a decade of use, the freeform surface was refurbished in 2023 at a fraction of the cost of replacement, adding many more years to its life.

UNIVERSITY OF ALBERTA

University of Alberta's climbing wall is housed in a unique, state of the art building. Close collaboration was critical to creating this one of a kind climbing facility.

LOUISIANA STATE UNIVERSITY

LSU's rec center provides students with lead climbing, top rope climbing, and bouldering opportunities spread across over 1,500 square feet of climbing surface. Close collaboration and a thoughtful design were necessary to coordinate the floating track wrapping through the climbing area.

TITAN BOULDER

The Titan is the International Federation of Sport Climbing approved bouldering wall. It was featured in the 2023 World Championships in Bern and will be used in the Paris Olympics. The Titan's diverse competition angles make it an exceptional training tool for all climbers.

OUTDOOR BOULDERS

EP's Outdoor Boulders offer something for all ages and abilities while promoting outdoor recreation. Options range from small boulders for toddlers to custom pieces designed to challenge experienced climbers.

HOLDS AND VOLUMES

EP Climbing designed and manufactured the first commercial climbing holds in 1985, revolutionizing the sport of climbing.

Today, we harness the power of EP Global to collaborate with industry leading partners worldwide in manufacturing high-quality holds, macros, and volumes.

Joey, EP's holds and volumes sales manager, can curate a custom package or give you the beta on our hold and volume lines. As a renowned shaper and L4 route setter, he knows a thing or two about holds.

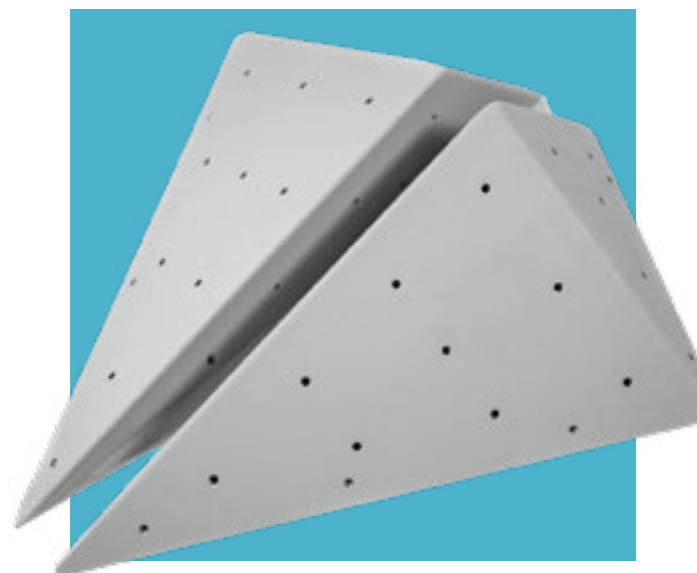

HOLDS

FIBERGLASS MACROS

WOOD VOLUMES

DUALTEX VOLUMES

VOLUMES

Used to alter wall angles and create more dimensional climbing, EP's wood volumes are produced in house and shipped worldwide from our Bend, Oregon facility. They've been featured in all manner of competitions and facilities.

PHARAOH RANGE

23 pieces; 10 shapes, 1-3 sizes
EP's first shapes
Designed to interact

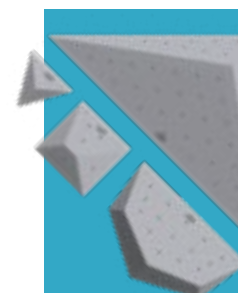

BIO RANGE

36 pieces; 4 shapes, 3 angles, 2 sizes
Grabbable wood volumes
Designed for Dual Texture

GEM RANGE

30 pieces; 5 shapes,
mirrored, 3 sizes
Asymetric and irregular

ESSENTIAL RANGE

24 pieces; 8 shapes, 3 sizes
Classic volume shapes

SWEET RANGE

12 pieces; 6 shapes, 2 sizes each
Standardized radii for nesting
curves

OUTLAW RANGE

18 pieces; 7 shapes, 1-4 sizes
Broad variety of must-have oddities

MACROS

EP leverages its vast network of global manufacturing partners to produce the highest quality Macros using the latest technology.

DISH RANGE

13 pieces; S-2XL

Dual texture fiberglass

Variety of grips

BARCHAN RANGE

20 pieces; S-XL

Directional, dual texture fiberglass

Jugs and slopers

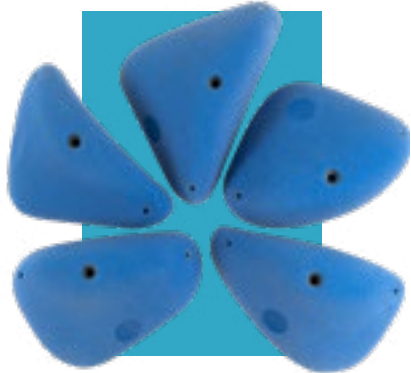

HOLDS

Manufactured by Peak Performance Polymers in Ohio, EP's holds are high quality polyurethane with industry color matches and short lead times.

WRASSLERS

60 shapes; XS-5XL
Incised slopers with a subtle texture
Excellent for steep, powerful climbs

FORM FAMILY

135 shapes; XS-XL
Basic shapes prioritizing function
Economically sized for the grip
Great for home walls and spray wall

CAVERNS

60 shapes; XS-5XL
Varying between slopers, jugs, and crimps
Variety makes caverns an excellent tool for setters

CAMBRIANS

60 shapes; XS-3XL
Sandstone inspired subtle jugs
Optimal for setting moderates

SWITCHBLADES

60 shapes; XS-5XL
Dual texture edges
Challenging, directional holds

SERVICES

As pioneers of indoor climbing, EP specializes in designing, building, inspecting, and maintaining state-of-the-art climbing walls. With our comprehensive range of services, we support you in caring for your walls through their entire life span.

INSPECTIONS AND MAINTENANCE

EP takes climbing wall safety seriously. Our inspection and maintenance services guarantee a thorough examination of your facility, addressing potential issues and ensuring compliance with industry standards.

ROUTE SETTING

EP's route setting services cater to all levels of climbers, from beginners seeking a challenge to seasoned enthusiasts pushing their limits. Our route setting experts bring creativity and technical precision to each climbing wall, offering a diverse range of routes to keep climbers engaged and excited.

CONSULTATION

When it comes to creating exceptional climbing environments, EP's consulting services stand out. Our team of experts provides insightful advice and recommendations tailored to your facility's unique needs. From initial conceptualization to strategic planning, we guide you through the entire process, ensuring your climbing wall dreams turn into a reality.

TRAININGS

Investing in your staff is crucial to delivering a top-notch product to your customer. EP offers professional development for climbing wall staff covering topics like: instructional techniques, route setting best practices, and climbing gym management training.
