Outdoor or indoor?

How many holds?

Hard or easy?

Check size!

How to choose holds?

Here are a few tips!

The choice of climbing holds is an important step for the life of your climbing wall.

Outdoor or indoor use

For outdoor use, we recommend PolyEster holds.

Quantity

- For bouldering: use between 5 and 15 holds for a boulder 4.5 meters high.
- For lead: use 3 to 4 holds per meter for a hard route, and 6 to 7 holds for an easy route. Also, in order not to saturate your wall, we recommend to keep up a maximum 3 routes per climbing line.

Difficulty of the route

To help you in selecting holds, we offer a rating scale for each set. This is indicative of the complexity of the hold.

The size of the holds

It depends on their average diameter:

XS 0 to 5 cm	XL 16 to 22 cm
S 5 to 8 cm	XXL 22 to 30 cm
M 8 to 11 cm	A Mix
L 11 to 16 cm	

Climbing Holds

CHART

Feet

Generally small holds that can also be used as crimps.

Gaston

A sideways hold larger than a sidepull where the whole set of fingers are in contact.

Crimp

An incut edge that requires all the power in your fingers.

Edges/Ledges

A larger version of a crimp where the thumb can be used to stabilise the move.

Mono

A single finger pocket.

Rails

A longer thinner hold.

Jug

A incut hold big enough to grab hold of naturally. Come in a range of sizes from XXL for 2 hands down to fingers only.

Sloper

A large hold with no edge using all or part of the palm to grip.

Undercut

Where the gripped edge faces downwards.

Macro

Generally a very large hold made from glass fibre.

Volume

Made from ply in a multitude of designs.

FITTING METHODS

Screw on

2 options here, screw only or dual fix where enough screw holes have been added along with a bolt hole which can be plugged, Volumes are only ever screw on.

Bolt on

1 bolt hole with anti-rotation screw holes included to stop spinning.

Finishes

Single tex

Where the whole hold has texture on it.

Dual tex

Only part of the hold is textured.

Pinch

Held using a squeezing grip.

Sidepull

Is what it says and can be any number of hold types set for this method.

Pocket

An incut edge that requires all the power in your fingers.

Fixings

Here are most of the fixing tools we supply you and their recomended use.

To help you choose the right screws, you can refer to the « Recommended screws (not included) » section that is specified in each product description. Please note that this information is not exhaustive and that the screw sizes may vary depending on the thickness of your wall

	EQ821	Allen key for tamper-proof screws	To be used for FHC tamper-proof bolts installation

Our installation recommendations

To ensure safety, the climbing holds require special attention during assembly :

- We recommend the use of a torque wrench set to a maximum of 35 N.M.
- The surface must be flat, unbroken and clean.
- It is essential to use the holes provided for the anti-rotation screws.

Most of our holds are equipped with a dual fixing system that allows the use of different bolts :

- CHC M10 bolts (cylindrical-type)
- FHC M10 bolts (counter-sunk-type)

The holds colours

We offer a vast selection of colours.

- PE POLYESTER
- PU POLYURETHANE

Technical information

The materials

We use two materials for our climbing holds :

- **POLYURETHANE** : This material is both light and resistant to impact forces. We offer a different choice of colours : bright fluorescent (« fluro ») ones.
- **POLYESTER** : This is the traditional resin used for climbing holds. The touch is dry and the holds are resistant to abrasion.

Quality and certifications

- EPS – EXPLOSION PROOF SYSTEM**
The EPS system is a patented technology developed by EP CLIMBING. If a bolt-on hold should develop a crack or break across the fixing hole, the hold will remain in place connected together by the metal EPS component and the pieces will not fall. This system is implemented on all large volume PE holds.
- **EN 12572-3 : HOLDS CERTIFICATION**
All EP holds comply with the European standard for climbing holds. Rigorous tests are randomly carried out on the sets of holds.
- EN 1176-1 : PLAYGROUND CERTIFICATION**
EP Climbing offers a large range of holds that are certified to comply with the European standard for playgrounds. They can be used by children older than 2 years old.

Maintenance

Climbing holds must be cleaned regularly. Simply wash with warm water and a stiff brush. Do not use any solvent detergent that could weaken the hold. A damaged climbing hold cannot be repaired.

MACROS

Round off the angles

Fibreglass Macros have always been present in EP Holds Range. Iconic shapes such as Wok, Taijitu and Bubble have become a must-have standard.

From local gyms to world Championships, Route-setters are always finding new ways of using them!

Colour options :

Barchan Smooth Pack

- 3 macro
- 36*24*7 cm
- Recommended screws (not included): 9 woodscrews 5*70

WOODEN VOLUMES

3 dimensional climbing

EP Holds offers you a complete range of volumes. They will allow you to create new moves and rethink the geometry of your walls in a simple and effective manner.

The bolt-on holds can be fixed on the surfaces of the volumes as there are numerous threaded inserts.

Standard colours :

*Other colours are available only under request.
Please note the delivery time will be longer to these colours.*

SHAUNA COXSEY

Fundamental climbing movements

I am so excited to share the latest set of holds from my range with Entre-Prises. The vision for the latest set is that a routesetter could create an entire circuit with these holds alongside the previous range which is why I was really busy in creating lots of new shapes to add onto the collection!

Continuing the principles from the previous set, these holds are designed to interconnect with each other so setters can create stoppers or improve holds by pairing them together increasing the amount of possibilities for the setter.

It was so good seeing what setters produced with the last range and I am looking forward to what they come up with using this set in 2021!

ATAMI

Waves inspiration

Parisian duo, Bleaujob is route setting in all its facets.

From competition to climbing gyms, we were keen to offer a range that would be accessible to as many people as possible.

The shapes are more voluminous and allow 3D climbing, something to play with from beginner to expert.

Atami (wave in Japanese), shaped under «la dent de Crolles», Rhône Alpes, offers a whole range of outstanding shapes.

SIMON

Modern climbing style

A shaper for EP for more than 3 years. Simon continues to expand the Absolute range and is developing his own range and bringing a wave of originality.

«Shape is a subtle balance between ergonomics and design. inspiration comes from the desire for a technical and comfortable grip. Simple and pure shapes, reflecting a modern climbing style. Forget the superficial, concentrate on the essential. Imagined by the mind, sculpted for reality. For free climbing, for the beauty of movement, for pleasure.»

VERSA PACK

Designed in collaboration with Impact Routesetting, the **Versa Pack** is specially created for route setters. It offers a comprehensive selection of holds and grips, combining diversity and modern shapes to create varied routes suitable for all levels. Ideal for **lead** and **bouldering** setting, it is a versatile and practical solution for climbing gyms and public facilities.

The packs are also divided into mini-packs, which can be purchased individually to meet the specific needs of each facility and increase variability.

TRAINING

To reach new heights

Practice and training enables climbers to grow and develop.

For this, we offer fun, compact hangboards made with the "SoftTouch" texture, specially developed to protect your skin while training.

Campus rungs and wooden balls allow you to progress by introducing new grips and various moves. These tools allow you to work, among others, the strength of your fingers, forearms and biceps.

Colour options : *please refer to page 7*

OFFICIAL DISTRIBUTOR OF LEMUR TRAINING BOARDS

Diversify your training area by including a Lemur board, with the **Kilter** or **Tension 2** systems.

GREENHOLDS

*Proud distributor
of Greenholds*

Beginning with both training and downclimbing holds, you can reduce your carbon footprint with Greenholds' climbing holds, 100% recyclable and made of raw materials from waste streams.

These wear-resistant, lightweight and easy-to-clean climbing holds deliver both high-end performance and a solution that protects the planet.
