

THE TITAN BOULDER

Developed by EP Climbing in collaboration with World Climbing, the TITAN is a bouldering wall designed for international competition.

Its distinctive geometry provides a unique environment for competition-style climbing, training and route setting, from experienced climbers to competitive athletes.

DESIGNED FOR COMPETITION & TRAINING

A COMPETITION HERITAGE

Developed for the international stage, the TITAN features a distinctive geometry inspired by the demands of modern competition climbing.

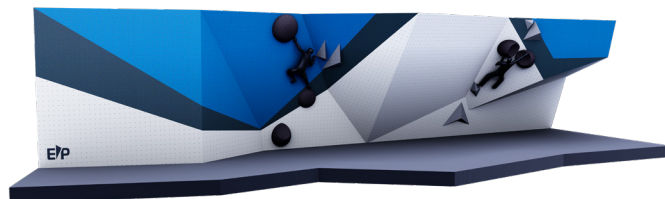

FOR EXPERIENCED CLIMBERS AND ATHLETES

Its varied angles and shapes provide challenging climbing across a wide range of movements, while offering athletes a dedicated tool for competition-focused training.

FOR ROUTE SETTING

The TITAN geometry offers extensive possibilities to create varied, technical and challenging boulders.

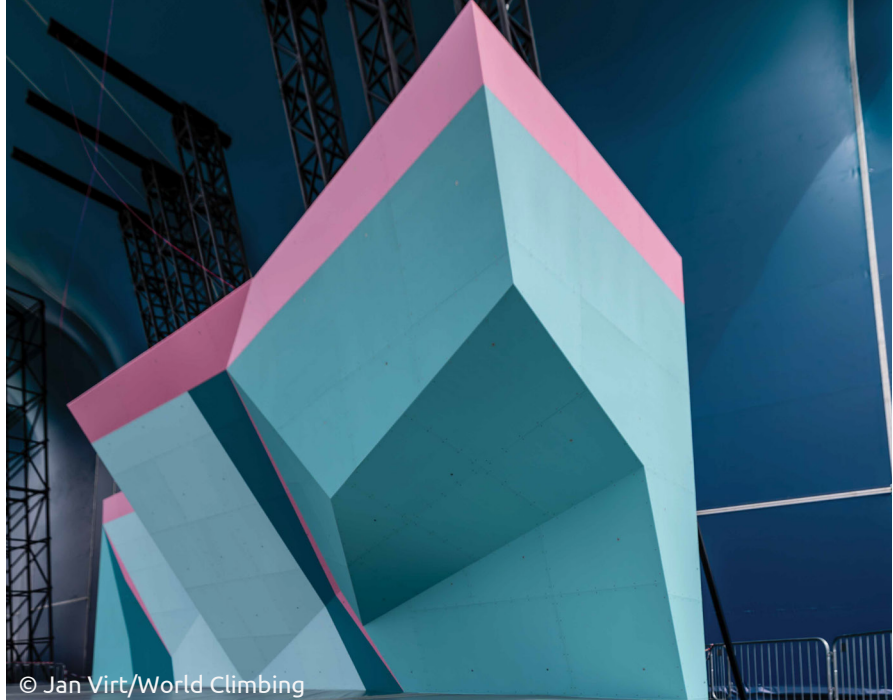

A TITAN opens the door to the **TITAN World League**: an international community of gyms taking on the same boulders, on the same wall. Join the ongoing challenge and compare rankings for climbers and participating gyms worldwide.

Environment: Indoor / Outdoor

Safety Standard: EN12572

Design protection: Registered international industrial design – Hague System, Reg. No. DM/221640
